

LAWNS TO LEGUMES DEMONSTRATION NEIGHBORHOOD

POLLINATOR SHORELINE BUFFERS

Six shoreline native buffers were installed around Green Lake as part of the Chisago SWCD's Lawns to Legumes Demonstration Neighborhood program and the LID Landowner Cost-Share program. These shoreline buffers provide critical pockets of pollinator habitat while keeping shorelines stable and filtering runoff before it enters the lake. Landowners are responsible for the maintenance of these projects to ensure their continued success.

Partners:

BWSR
Chisago Lakes Lake
Improvement District (LID)
Chisago Soil & Water
Conservation District (SWCD)

Total Plants Installed:

2,485

**Length of Shoreline
Protected:** 450ft

Targeted Water:

Green Lake

Completion Date:

10/15/2020

May I Visit?

Yes – All buffers have
pollinator signs and can be
viewed from the water.
