

Field Activities

CSAH 30 (Forest Blvd) Improvements (CSAH 17 (Athens Trail) to Trunk Highway 95)

Upcoming Activities:

The Chisago County Highway Department, in cooperation with the City of North Branch, is in the process of developing preliminary plans for improvements along CSAH 30 between CSAH 17 and Trunk Highway 95. Construction is tentatively scheduled to begin in 2025. To prepare preliminary plans, a variety of information needs to be collected along this route. This includes field surveying for existing topography, soil borings and wetland delineations. You may notice these activities commencing in the next few weeks. A Public Information Meeting will be held at a future date to share more detailed project information with the public. We would appreciate your cooperation in this important project. Please drive safely in the area as we begin to collect field data. As the project progresses additional project details will be added to the project website <https://www.chisagocountymn.gov/867/Road-Construction.Gov>

If you have any immediate questions or concerns regarding this project, please feel free to call me at (651) 213-8723, I can also be reached by email at Ben.Hobert@chisagocountymn.gov
