

# LID RESIDENTIAL BMP COST-SHARE PROGRAM

The Chisago Lakes Lake Improvement District (LID) and the Soil & Water Conservation District (SWCD) have partnered together to provide cost-share incentives for up to 50% (\$1,500) of the cost of installing a water quality best management practice (BMP) on their property. Projects installed in 2017 include: rain gardens, shoreline restorations, and hillside erosion control practices.

Each year technical assistance is provided to 10 or more landowners who are interested in improving water quality on their property. This year 6 landowners applied for cost-share and 3 completed their projects within the calendar year.

## Partners:

Chisago Lakes Lake Improvement District  
Chisago Soil & Water Conservation District

## Targeted Water:

Chisago Lakes  
Chain of Lakes

## Completion Date:

2017
